INTRODUCTION

We may call it a colonial hangover but there is no escaping the reality that Indians who communicate fluently in English definitely have an edge over their fellow citizens who do not. Besides the success of English as a global language is well established and long acknowledged. Our students are mostly from remote areas lacking in proper grooming or a complete development of personality. One of the deficiencies of wholesome development is severe lack of confidence due to insufficiently developed skill of communication. The communicative English training programme is thus of prime importance
